PROFILE

Mobile developer with **5+ years** shipping cross-platform apps on iOS and Android, strong in **Flutter** and **React Native** with clean architecture. Comfortable end-to-end — I've shipped a solo app to **3,000+ users** on the App Store and Google Play, built on a Firebase + Cloud Functions backend with Gemini AI integration.

SKILLS

LANGUAGES	Dart · JavaScript/TypeScript · Swift · Kotlin/Java
FRAMEWORKS / UI	Flutter · React Native · UIKit · Android XML
ARCHITECTURE	BLoC · MVVM · MVC · Clean Architecture · Redux
BACKEND (FAMILIAR)	NestJS · Gin (Go)
CLOUD & AI	Firebase · Cloud Functions · Gemini API
DATABASES	MongoDB · PostgreSQL · Firestore

EXPERIENCE

May 2025 — Present
Pitek
HO CHI MINH CITY

Mobile Developer

- Took on senior-level responsibilities from the project's start, helping build the app from the ground up.
- Architected the mobile codebase as a monorepo housing both apps, defining the structure and patterns the team builds on.
- Set up the mobile CI/CD pipeline, automating builds, testing, and releases to the App Store and Google Play.
- Own core features end to end across iOS and Android — from technical design through implementation and delivery.
- Drive code quality and technical decisions, collaborating with the team to ship features and improve app reliability.

Feb 2025 — Apr 2025
Viet Japan Digital
HO CHI MINH CITY

Mobile Developer

- Took over and maintained a handed-over internal mobile app, keeping an existing codebase stable and well supported.
- Supported the app's core functions — internal document management, product-highlight showcases, and intern training.

Oct 2023 — Jan 2025
Centrala
HO CHI MINH CITY

Mobile Developer

- Owned the mobile codebase architecture from the start of the project, applying clean-architecture patterns for scalability, maintainability, and reusability.
- Translated design mockups and wireframes into responsive, pixel-consistent UIs across a range of devices and screen sizes.
- Evolved features based on user feedback and product requirements, taking ownership of code quality across the app.

Oct 2022 — May 2023
ViHAT Software
HO CHI MINH CITY

Mobile Developer

- Delivered features within an architecture and patterns set by the team lead — building a solid grasp of how a mobile codebase is structured and maintained.
- Built intuitive, user-friendly interfaces in close collaboration with UX/UI designers and integrated them with backend services.

May 2021 — Feb 2022
TMA Solutions
HO CHI MINH CITY

Mobile Developer

- Started my career here, implementing assigned features and fixes under the guidance of senior developers.
- Built core fundamentals — turning requirements into working mobile features while learning the team's standards and workflow.

EDUCATION

2017 — 2021

B.Sc. in Computer Science — Software Engineering
Ho Chi Minh City University of Technology (HUTECH)

KEY PROJECTS

Picare

Pitek

A property-management platform that digitizes day-to-day operations for residential building management companies — connecting apartments, residents, and on-site staff in one system.

- Build two Flutter apps from a shared monorepo — an Agent app for staff and staff managers, and a Client app for residents.
- Implement core modules for apartment/unit management, resident records and service requests, and staff task management.
- Integrate the apps with a Firebase + Cloud Functions backend.
- Develop new features and performance improvements that ship to the App Store and Google Play.

Dart · Flutter · BLoC · Firebase · Cloud Functions

VocabNote

Personal Project · Solo · App Store · Google Play

A mobile English-learning app I designed, built, and shipped on my own — owning the full stack from the app UI through the backend, AI features, and store release.

- Grew the app to **3,000+ users** across the App Store and Google Play.
- Delivered the product end-to-end — mobile app, backend, AI integration, and deployment.
- Built a serverless backend on Firebase with Cloud Functions for app logic and data.
- Integrated Google's Gemini (Google AI API) to power AI-driven learning features such as content generation and explanations.

Dart · Flutter · Swift · Kotlin · Firebase · Cloud Functions · TypeScript · Gemini API

CNext

CNext JSC · Freelance

A finance & insurance distribution platform connecting partner banks and financial institutions with a community of sales agents — covering digital bank accounts, loans, credit cards, and insurance.

- Managed the production release process and ongoing maintenance of the app.
- Maintained and updated the eKYC (identity-verification) SDK.

Dart · Flutter · BLoC · Swift · Kotlin

Lovely Talks

Centrala

A 1:1 English-tutoring app that connects learners with live teachers worldwide for on-demand, personalized lessons.

- Built lesson booking, scheduling, and teacher-discovery flows in Flutter.
- Implemented responsive UI and BLoC state management for a smooth real-time booking experience.

Dart · Flutter · BLoC

WOWmap Marketing

Centrala

A location-based marketing platform using geospatial technology to help businesses reach and engage their target audience.

- Developed map and location-driven features in React Native with Redux state management.

JavaScript · React Native · Redux

Toy Rental

Centrala

A marketplace for short-term toy rentals — educational, outdoor, and trending toys for children of all ages, built end to end in Flutter.

- Implemented catalog browsing, search, rental booking, and order-tracking flows with BLoC state management.
- Built responsive, consistent UI across phone and tablet layouts.

Dart · Flutter · BLoC

SR Marketplace

ViHAT Software

A farm-management app for agents to manage tasks, file leave requests, and organize replacements, with farm-wide oversight for chiefs.

- Developed task management, leave-request, and replacement workflows for field agents.
- Implemented role-based views and dashboards for agents and farm chiefs.

Dart · Flutter · BLoC

Fetcha

TMA Solutions

A food-ordering app that helps customers search online ordering platforms for the right restaurant or dish.

- Built restaurant and dish search with a responsive ordering UI in React Native.
- Collaborated with the team on new features and bug fixing.

JavaScript · React Native
